- Nursery      Ages 3 to 4
- Preschool      Ages 4 to 5
- Kindergarten      Ages 5 to 6

# Early Childhood Education (ECE)

An International Early Childhood Education curriculum based on the **California Framework** and tested and revised over a period of 10 years. The curriculum is methodology-independent, teacher-friendly, and is structured yet flexible.

A high quality curriculum encourages children to learn for themselves and that has been Liberty's goal since inception. The curriculum is designed to introduce language arts (listening, speaking, comprehension), beginning mathematics, and includes science for all levels.

As of 2023 the curriculum is distributed worldwide via Amazon. It includes Guides for Teachers that include videos, audios, and educational support materials. The curriculum is SMART classroom-ready.

## Pre-primary Mastery Series

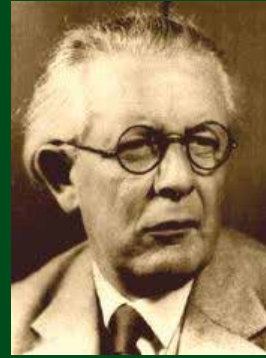

- Content Integrates with Learning Objectives
- Digital Curriculum Library
- Supplementary resources online
- Smart classroom-ready with Audio/Video

# Piaget & Vygotsky Theories

## EARLY CHILDHOOD DEVELOPMENT

Early Childhood Education is no longer seen as a luxury for the rich, it is an important part of a child's development. Piaget who identified Cognitive Development Theory and Vygotsky who identified Social Learning Theory. Given our understanding of ECE in the last 50 years we urge all parents to give consideration to an organized preschool program that emphasizes early literacy, social development, and creativity.

## Vygotsky's Social Development Theory

Vygotsky's theories stress the fundamental role of social interaction in the development of cognition (Vygotsky, 1978), as he believed strongly that community plays a central role in the process of "making meaning."

## Piaget's Stages of Cognitive Development

STAGES	AGE RANGE	DESCRIPTION
Sensorimotor	From birth to 2 years	<ul style="list-style-type: none"><li>• Identifies object performance, the object still exists when out of sight</li><li>• Recognition of ability to control object and acts intentionally</li></ul>
Preoperational	2 to 7 years	<ul style="list-style-type: none"><li>• Begins to use language</li><li>• Egocentric thinking difficulty seeing things from other viewpoints</li><li>• Classified objects by single feature i.e. color</li></ul>
Concrete Operational	7 to 11 years	<ul style="list-style-type: none"><li>• Logical thinking</li><li>• Recognizes conservation of numbers, mass and weight</li><li>• Classifies objects by several features and can place them in order</li></ul>
Formal Operational	11 years and onward	<ul style="list-style-type: none"><li>• Logical thinking about abstract propositions</li><li>• Concerned with the hypothetical and the future</li><li>• Create hypotheses and test</li></ul>

FOCUS IS ON:  
**Social-emotional Development**  
**Language & Literacy**  
**Language Development and**  
**Mathematics.**

# Early Learning Domains & Preschool STEAM

## Adaptive Learning Styles

### DEVELOPING HEALTHY INDIVIDUALS

Each child learns in a different way. We provide teachers with the tools and guidance to liberate a child's natural curiosity while building problem-solving and life skills together with confidence.

### Language and Literacy

#### READING & WRITING

The early years are critical for literacy development. From pre-reading to writing in our older students, your child's journey to developing important literacy skills and a love of reading is what Liberty Education's preschool curriculum will provide.

### Mathematics

#### EARLY NUMERACY & LOGIC

Early exposure to mathematics develops logic, reasoning, and leads to the development of problem-solving skills that will apply to other domains in academics and life.

### Creative Arts

#### IMAGINATION AND THE ARTS

Visual and creative arts including music and dance stimulate the imagination and creative thinking. We offer hands-on activities with stimulating content-rich lessons to encourage early arts and creative skills development.

### Physical Development

#### HEALTHY BODIES, HEALTHY MINDS

Active adults begin as active children. Show your child fun ways to practice balance and motor skills with time to slide, climb and run on our age-appropriate playgrounds and learning spaces.

### Social & Emotional

#### ATTITUDES & BEHAVIORS

Emotional intelligence leads to future success. We strive to integrate the development of social and life skills along with character development into daily routines.

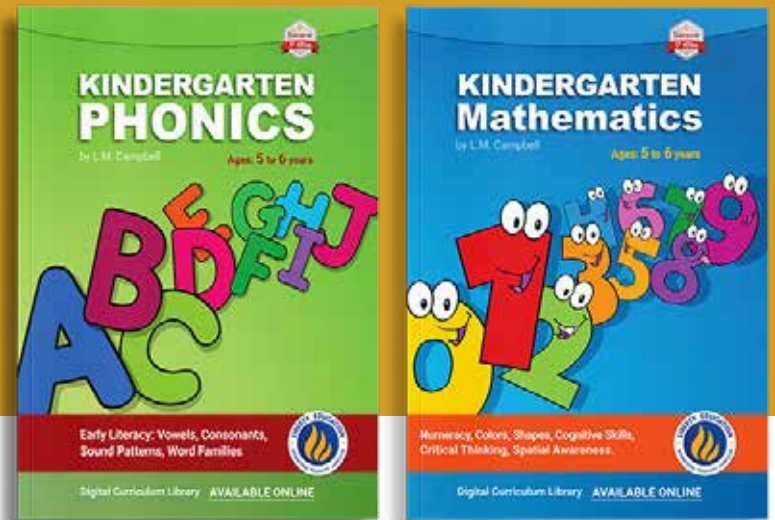

STEAM is an inter-disciplinary approach to learning.

Through the process of experimenting and exploring children are using creative and critical thinking skills.

# Kindergarten Level

STRONG FOUNDATION  
**Better future**

## International Kindergarten

Ages 5 to 6

The goal in kindergarten is to establish a level of academic skills and understanding that will be the foundation for future success in primary school and beyond.

### KINDERGARTEN PHONICS

Students begin the reading journey using the blending of phonetic sounds. Phonetic skills are further reinforced in the learning process as writing/composition skills are introduced, vocabulary is developed, and spelling is emphasized.

### KINDERGARTEN MATHEMATICS

The mathematics skills of the children are taken to the next level of difficulty, continuing the number concepts learned in the pre-kindergarten programs. The students in the bilingual program typically enter Grade 1 able to read, write, and speak in two languages.

# International Preschool Curriculum

## Nursery Education Level

### NURSERY PHONICS

### MATHEMATICS FOR NURSERY

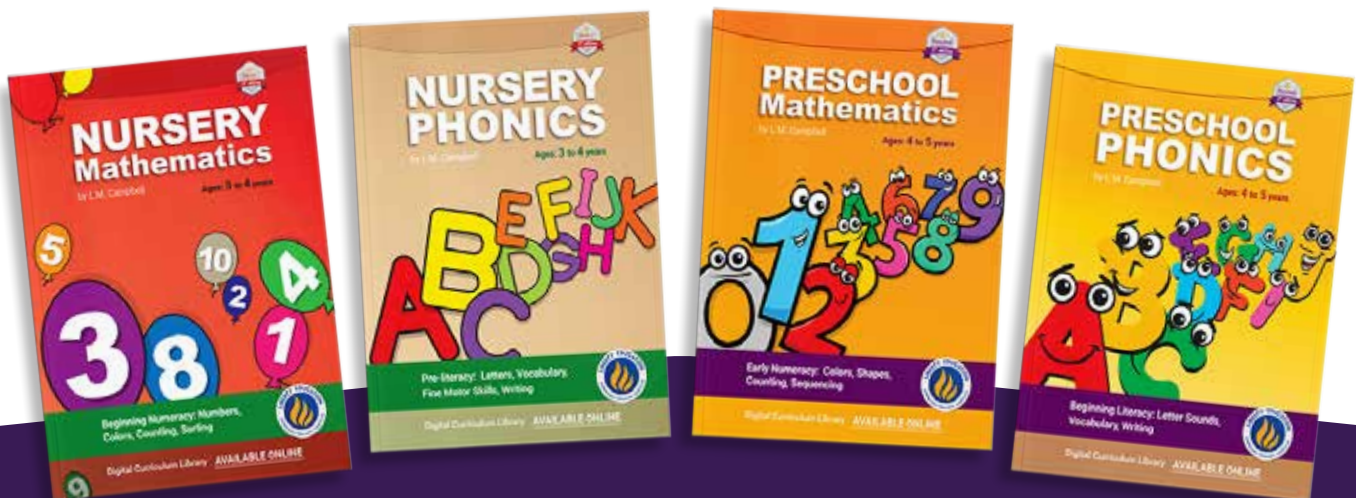

Nursery education is the very beginning of learning how to learn. Attention is paid to delivering what is developmentally appropriate for each child in a supportive manner. Beginning mathematics and language skills are presented with no "pressure to perform." This is when learning is fun. Emphasis is on developing vocabulary for all domains.

## Preschool or Pre-K Level

### PRESCHOOL PHONICS: ENGLISH LANGUAGE ARTS

### PRESCHOOL MATHEMATICS: INTRODUCTION OF NUMBER CONCEPTS

Children are introduced to building early reading and writing skills while building vocabulary. Problem-solving is introduced including concepts relating to numbers, shapes, colors and mathematics. Various teaching styles are employed to encourage curiosity and to develop life skills and problem-solving.

## SCHOOL BACKGROUND

Liberty International School is founded in 2011 and achieved MoEYS Khmer National Curriculum and International School Certification. We implement an internationally-recognized Primary School Curriculum. We use LED International Preschool Curriculum for our Early Years levels.

## STUDENT EDUCATIONAL OUTCOMES

We focus on directed learning at Liberty International School. Students who finish their primary education with us score and perform well in higher level education environments, here and abroad, both in Language Arts and Mathematics. Liberty has always provided full international curricula for all levels. In addition to the national curriculum, LIS has an official "international school license" from the MoEYS.

Thus, the well-rounded education at Liberty includes the Sciences, Social Studies, Arts, Music and Industry 4.0 technology with the aim of preparing the students for more rigorous academic environments in higher education.

### Schedule: Monday to Friday

8:00 AM – 11:00 AM

01:30 PM – 4:30 PM

### Facilities & Environment

- Comfortable & Spacious Classrooms
- Outdoor Playground
- Swimming Pool
- Smart Classrooms
- All classrooms with AC
- Child-proofed

### Documents and Records

- Comment books
- Quarterly Report Cards
- Established and Functioning Database
- Teachers are required to prepare detailed lesson plans

### Teaching Staff

Qualified foreign and Khmer teachers  
University graduates  
Experienced  
Responsible  
Professional attitude

*Please ask about food and nutrition options when you visit Liberty.*
